SUMMARY

Full-stack software engineer with 4+ years of experience building web applications with React, Next.js, and TypeScript on the front end and Java Spring Boot and Node.js/Express on the back end. Comfortable across the whole path from database to production: SQL, Docker, Nginx, and Cloudflare on self-managed VPS and AWS. Security-conscious, Linux-native, and focused on clean, maintainable code.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — **IT Wizard Co., Ltd — Apr 2024 – Present**
- Develop enterprise web applications on Korea's eGovFramework (Spring-based), using MyBatis with hand-written SQL for data access.
- Build and deploy React/Next.js front ends on self-managed VPS infrastructure with hardened server configuration and automated CI/CD pipelines.
- Develop Canvas-based JavaScript learning games for an LMS — handwriting/drawing practice, drag-and-drop matching of Korean characters and items, and interactive Q&A.

Full-Stack Developer — **In-house ecommerce — Nov 2023 – Apr 2024**
- Built full-stack e-commerce features with Node.js/Express and React, backed by MongoDB and PostgreSQL.
- Containerized services with Docker and configured Nginx as a reverse proxy for on-premise LAN server deployment.
- Set up CI/CD pipelines to automate builds and deployments to local infrastructure, improving release reliability.

Frontend Developer — **Freelance / Contract — Mar 2022 – Jan 2023**
- Developed responsive, accessible UI components with React.
- Improved front-end performance by optimizing API calls and rendering.
- Built and integrated RESTful APIs for dynamic content and third-party services.
- Delivered remote projects for international clients, ensuring consistent communication and on-time delivery.
